15. SUPPLEMENTARY NOTES Prepared in cooperation with the U.S. Department of Transportation, Federal Highway Administration from a study on Comparative Assessment of Computer Programs for Traffic Signal Planning, Design, and Operations. The opinions and conclusions are those of the authors and not necessarily of the Federal Highway Administration.		14. SPONSORING AGENCY CODE	
16. ABSTRACT The main goal of this study was to comparatively assess a group of selected computer programs for traffic signal planning, design, and operations. A comprehensive inventory was conducted and a detailed list of the currently available computer software was developed. A short description of individual software was provided, and a comparative processor software, and network software. The final recommendation of software included seven programs for isolated intersections, three preprocessor software, and five network software. Volume 1 Study Approach, Analysis and Recommendations Volume 2 Software Descriptions Volume 3 Recommended Software Output			
17. KEY WORDS Computer Software, Isolated Signals, Arterials, Grid Networks, Software Assessment		18. DISTRIBUTION STATEMENT No restrictions. This document is available to the public through the National Technical Information Service, Springfield, Virginia 22161

ACKNOWLEDGEMENTS

This report was prepared as part of Project HPR-PL-1 (27) Item 209 - "Comparative Assessment of Computer Programs for Traffic Signal Planning, Design, and Operations." This research was conducted by the Center for Advanced Research in Transportation of the College of Engineering and Applied Sciences at Arizona State University in conjunction with the Arizona Department of Transportation, and the U.S. Department of Transportation, Federal Highway Administration.

The project staff wishes to acknowledge the assistance provided by Arizona Transportation Research Center of Arizona Department of Transportation. Special thanks are extended to Mr. Harvey Friedson of the City of Tempe for providing the traffic data, and Mr. Mark Schlappi of Arizona Department of Transportation for making the McTran package available to the team and Dr. Robert Wortman, University of Arizona.

Volume 1: Study Approach, Analysis, and Recommendations
